

UPGRADE YOUR SESSION COLLECTION

Upgrade Possibilities for all Collections [★]

All of my collections include a set number of professionally edited photographs. Since many more beautiful moments often unfold during your shoot, you'll receive a curated gallery afterward featuring a personal selection of your most beautiful images. From there, you can take your time choosing your included favorites.

Would you like to preserve even more memories? Additional images can be added as an upgrade at any time. Each additional image is individually selected and professionally edited in high resolution, including a matching black-and-white version. The black-and-white versions of all selected images are automatically included in every collection and upgrade. Simply choose the color images that speak to you most deeply, the corresponding black-and-white versions will, of course, be included as well.
